

## Volunteers Needed:

# NHS Audiology Staff Needed for Research Study into Staff Experiences at Work During COVID-19.

Do you have experience working in an NHS Audiology Department during the COVID-19 pandemic? We want to hear about your experiences as part of a Master's Student Research Project for Aston University.

### You May Qualify If:

- You were employed in an Audiology department at some point between January 2020 and now.
- You are currently, or have recently been, employed by the NHS.
- Your role was Audiology service specific (i.e., Audiologist, Clinical scientist, Audiology assistant, audiology administrator, clinical service lead etc.).

### Participation Involves:

- A one-off one-to-one interview with the Student Researcher to discuss your experiences at work during the COVID-19 pandemic. Interviews will be conducted remotely (via Microsoft Teams or telephone) and will last about 1 hour.

### Potential Benefits:

- Though there are no personal benefits for taking part in this study, your participation will allow us to gather a variety of experiences to highlight similarities and differences between staff experiences. The results will be made available to you once the study is complete.
